GLOBAL BELT CONVEYOR MANUFACTURER WITH 24 HR TURNAROUND APPOINT COBALT AS UK AGENT

Lancashire based Cobalt Conveyors has brokered an exciting agreement to work exclusively with German based manufacturer Geppert Band, which designs and builds a wide range of belt conveyors.

On the market since 1967, Geppert Band is one of the Europe's leading manufacturers of conveyor belts up to 18 metres long for indoor use. It offers an extensive range of products oriented toward the wide variety of customer requirements and sectors: Flat, inclined, flexible and Z-shaped conveyor belts made from aluminium, steel and food grade stainless steel, with a wide variety of equipment and an extensive range of accessories.

Simon Turner, Managing Director is thrilled to have secured such a working relationship:

***“Since we started Cobalt Conveyors in 2007, I have been searching to find a manufacturer that would provide me with the opportunity to bring something to the UK market that no other conveyor company is offering.*”**

With a quality product range of impressive breadth, not only can Geppert Band and Cobalt offer belt conveyors that will address any requirement across a variety of industries – we can deliver those products within a timeframe that will give us a clear advantage over the competition!”

Mr Thomas Blesinger, Managing Director, Geppert Band explained what makes his product range so attractive in a very crowded and competitive marketplace:

“Here at Geppert Band, we place a strong emphasis on providing individual solutions to our clients’ problems. If desired, our conveyor belts may be designed so that they can be flexibly integrated into existing production processes. In addition however, we are understandably proud of our ability to turnaround production within 24 hours for four kinds of conveyor belts, at any length, in any width from 60 to 600mm. Even any other models can be delivered within 14 days. That’s an impressive level of service by anyone’s standards!”
