

CASE STUDY

Client: Hallam Beauty, Bradford

Project: H5 Complete System

Hallam Beauty needed to install a completely new conveyor system to fulfil a successful tender to supply an extensive hair and beauty range to a leading supermarket chain.

What We Did:

Following the success of an initial project for Hallam Beauty, Cobalt Conveyors were asked to design a full turnkey system incorporating existing equipment already owned by the company: I.e. filling machine, shrink wrapper, labelling machine, capping machine and date coder.

Cobalt then drew up detailed plans of the new proposed conveyor and following additional requirements from the client; these formed the blueprint from which the new conveyor was manufactured. Cobalt also supplied a bespoke control panel for the system.

Cobalt oversaw the manufacturing schedule and also fully installed and commissioned the line, both mechanically and electrically. Again the project was delivered within the timescale stipulated by the client.

“Cobalt was given this project based on its past success whilst working with us. The requirements for this system were much more complex and yet again Cobalt delivered in time and on budget.”

Paul Atkinson
Operations Director
Hallam Beauty

Need a conveyor? ...the key is Cobalt

Cobalt Conveyors fully embodies the skills and experience needed by any company seeking conveyor solutions. We can handle projects from concept to completion and provide innovative, efficient and cost effective solutions to you, our client, whilst ensuring outstanding service that is both flexible and accommodating.

Cobalt Conveyors specialises in all forms of materials handling regardless of your business environment. Whether you require a small one-off conveyor or a fully designed and installed conveyor system which has been customised to meet your exact requirements, we will deliver it via a completely professional service.
